Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

A; Description: catalyzes the hydrolysis of internal 1,4-alpha-D-glucosidic bonds
A; Pathway: glycogen/starch degradation
C; Superfamily: alpha-amylase, amyloliquefaciens type; alpha-amylase core homology
C; Keywords: extracellular protein; glycosidase; hydrolase; polysaccharide degradation
F;1-33/Domain: signal sequence #status predicted <SIG-
F;34-518/Product: alpha-amylase #status experimental <MAT>
F;34-519/Domain: alpha-amylase #status experimental <MAT>
F;336-359/Domain: alpha-amylase core homology <AMY>
F;139,238,273/Binding site: calcium (Asn, Asp, His) #status predicted
F;269,299,366/Active site: Asp, Glu, Asp #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                             A;Cross-references: GB:M18862; NID:g142496; PIDN:AAA22231.1; PID:g1
A;Experimental source: chromosomal DNA of strain 707
A;Note: amino end of mature protein also determined
C;Comment: This is the smallest of five starch-hydrolyzing enzymes
C;Function:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               alpha-amylase (EC 3.2.1.1) precursor - Bacillus sp.

N;Alternate names: 1,4-alpha-D-glucan glucanohydrolase; G6-amylase
C;Species: Bacillus sp.
C;Date: 31-Mar-1989 #sequence_revision 18-Aug-1995 #text_change 18-Jun-1999
C;Accession: A27705

A54541

A54541

alpha-amylase (EC 3.2.1.1) precursor - Bacillus stearothe:
alpha-amylase (EC 3.2.1.1) precursor - Bacillus stearothe:
N;Alternate names: 1.4-alpha-D-glucan glucanohydrolase
C;Species: Bacillus stearothermophilus
C;Date: 28-Oct-1994 #sequence_revision 18-Aug-1995 #text_
C;Accession: A54541
R;Jorgensen, P.L.; Poulsen, G.B.; Diderichsen, B.
FEMS Microbiol. Lett. 77, 271-276, 1991
A;Tatle: Cloning of a chromosomal alpha-amylase gene from
A;Reference number: A54541
